Skills

- I have experience assembling components based on customer requirements and installing, configuring, and maintaining devices, PCs, and software for end-users. You provide appropriate customer support and understand the basics of virtualization, desktop imaging, and deployment.
- I have the knowledge to identify risks, participate in risk mitigation activities, and apply security controls to maintain confidentiality, integrity, and availability. You are skilled in troubleshooting security events and incidents while operating with an awareness of applicable policies, laws, and regulations.
- I work at the Linux command line and perform maintenance tasks such as assisting users, adding users to a larger system, executing backup and restore, and managing shutdown and reboot processes.
- I am skilled in designing, configuring, managing, and troubleshooting wired and wireless networks, including Active Directory, LAN, WAN, and basic security. You understand and maintain network documentation and identify network limitations and weaknesses.
- You have a sufficient understanding of web markup, including HTML5 and CSS3, and are familiar with server-side CSS pre-processing platforms and web standards. You are knowledgeable in cross-browser compatibility issues and ways to work around them. Additionally, you adhere to best design practices and understand differences in HTML5-based views in email clients.
- Design and Security Requirements: You are capable of designing capture solutions while addressing security requirements.

Personal Attributes

- Self-Starter: You are able to self-start and complete work requirements effectively.
- Strong Work Ethic: You demonstrate a strong work ethic and dedication to your work.
- Professionalism: You succeed in multitasking while remaining professional and courteous in a fast-paced environment.

Work History

Data Center Technician

Akkodis, West Jordan , UT

March 2024 -
Current

I install, configure, test, troubleshoot and maintain hardware (like servers and its components) and server software (like Google's Linux cluster). I'll also take on the configuration of more complex components such as networks, routers, hubs, bridges, switches and networking protocols. I'll participate in or lead small project teams on larger installations and develop project contingency plans.

TECHINICAL SUPPORT ENGINEER II, API INTEGRATION

NICE CXONE

October 2021 -
March 2024

- Troubleshoot customer API issues, focusing on API calls, timestamps, and outputs. Replicate calls to diagnose issues and resolve scripting errors using JSON, JavaScript, and XML. Monitor API logs and escalate complex issues to R&D or Tier 3 as needed.

IT Support Engineer I (Level 4)

Amazon.com Services LLC

June 2020 - June
2021

Provided technical support for computer hardware, operating systems, and network connectivity issues. Primarily worked with Windows and Linux systems. Solved straightforward problems without defined SOPs.

Client Response Services(Helpdesk Agent)

Goldman Sachs

August 2019 - June
2020

Handled end-user queries via phone, email, and chat support. Coordinated with engineering teams and product owners for troubleshooting. Managed issues from start to finish, ensuring timely resolution and maintaining subject matter expertise in various systems and products

Tech Support Engineer

Symantec

February 2018 -
August 2019

Provided enterprise-level support for Symantec Messaging Gateway, including inbound and outbound messaging security and threat detection. Troubleshoot customer issues using SSH terminal and commands like telnet, ping, tracer. Recommended SMG installations in Hyper-V or VMware environments.

Client Support Technician (CST)

Sumaria System

June 2017 -
February 2018

Responded to calls for technical inquiries and resolved issues

related to Windows workstations. Installed hardware/software and handled warranty service coordination with vendors/manufacturers.

Service Desk Agents/Computer Operators

Spear INC

*November 2016 -
June 2017*

Served as the initial point of contact for user issues, providing technical support for hardware, systems, and applications. Troubleshoot network connectivity issues and assisted remote employees on a corporate network.

Technical Support

Inthinc

*August 2014 -
August 2015*

Supported large corporations by troubleshooting driving device issues and managing large fleets through a personalized internet portal.
